

WHO KNEW THAT ELECTRICAL SAFETY COULD BE SO MUCH FUN?

In these uncertain times, here's something you can be sure of: Southern California Edison (SCE) is here for our communities, doing everything we can to keep people safe.

We're also doing our part to keep everyone—including kids—informed about electrical safety. With schools closed, now's a perfect time for the family to check out all of the fun learning experiences on our [e-SMARTkids website](#).

You'll find videos, interactive games, experiments and activities that educate and entertain—all in a colorful and energetic style that captures and holds the interest of young students. Just the thing to keep the whole gang busy!

Please share this website with your teachers and students. See you on e-SMARTkids!
